The course will include:

- Cervical cytology
- Ear care
- Immunisation
- ECG
- Venepuncture
- Wound management.

The course will also include an appreciation of General Practice including clinical governance, QoF and the developing role of Clinical Commissioning Groups.

Practices will be eligible for a free NMC endorsed Learning and Assessing in Practice, to support those acting as mentors to students on this course.

Entry Requirements: Applicants should have a DipHE or equivalent or have undertaken accredited study at minimum Diploma level

Award: 40 credits at degree (Level 6) or Master's (Level 7)

Please contact Pippa Stupple, Programme Director, General Practice Nursing, by email: Philippa.Stupple@hee.nhs.uk to confirm your place.

Mentors Needed

Are any of your staff undertaking the **Foundations in Practice Nursing Course**? Or would you like to have pre-registration or Return to Practice students gaining their **clinical experience** with you? If so, they will need a mentor to guide, support and assess their progress.

We are offering a fully funded Learning and Assessing Practice unit (Mentorship) to equip your staff to mentor students in practice.

Learning & Assessing in Practice (Mentorship)

This fully funded unit of study will enable you to mentor these students and have your name added to the University mentor database.

The course will include

- Facilitating learning
- Outline of learning and teaching strategies
- Creating a learning environment
- How to support students
- Barriers to learning
- Assessment strategies and feedback
- Professional Standards and accountability
- Leadership for education within practice

The course is delivered frequently throughout the year and consists of one day attendance at the University and four days online study for recognition of a mentorship qualification.

There is an optional second part, consisting of a further half day at the University and completion of an assignment which, on successful completion will attract 20 academic credits at either level 6 or 7.

If you are interested in offering BU students placement experience in your practice, please contact awatson@bournemouth.ac.uk

Please contact Pippa Stupple, Programme Director, General Practice Nursing, by email: Philippa.Stupple@hee.nhs.uk to confirm your place.

Care of Clients with Long-term Conditions

A **fully funded**, accredited six-day programme for Nurses supporting those living with long-term conditions.

This course aims to develop the skills for Practice Nurses working in Primary Care.

This introductory course will focus on the skills and insights needed to provide effective patient centred, evidence based care, across a range of long-term conditions in the GP surgery setting.

Taught by practitioners, the course will include:

- Impact of long-term conditions
- Using motivational interviewing
- An in-depth exploration of:
 - Diabetes
 - Asthma/COPD
 - Cardiovascular disease and hypertension
 - Managing long-term conditions in the General Practice setting e.g. QoF, the role of clinical commissioning groups.

Course dates: 12, 18 & 26 October 2017, 2, 8 & 15 November 2017

Location: Lansdowne Campus, Bournemouth

Entry Requirements: Applicants must be working as a Practice Nurse or within a NHS Trust and should have a DipHE (or equivalent) or undertaken study at a minimum of diploma level

Award: 20 credits at degree or Master's level

Please contact Pippa Stupple, Programme Director, General Practice Nursing, by email: Philippa.Stupple@hee.nhs.uk to confirm your place.

Care of Clients with Minor Illness

Evaluating the care of clients with minor illness.

This **fully funded** introductory course aims to develop the skills for Practice Nurses working in Primary Care.

This course will enable you to critically evaluate, audit and develop the care required for clients presenting with

minor illness. You will gain the necessary tools needed to develop the care of all clients regardless of why they are visiting you.

Following the course you will be able to:

- Holistically and effectively assess client need using a systematic framework

- Critically appraise the evidence base and implement care for the three most common presenting minor illnesses
- Audit and evaluate the care provided and use the data to develop and enhance the service you are providing.

Course dates: 26 & 27 June, 6, 7 & 10 July 2017. This course will also run in February 2018

Location: Lansdowne Campus, Bournemouth

Entry Requirements: Applicants should have a DipHE or equivalent or have undertaken accredited study at minimum Diploma level

Award: 20 credits at degree or Master's level

Please contact Pippa Stupple, Programme Director, General Practice Nursing, by email: Philippa.Stupple@hee.nhs.uk to confirm your place.

Non-Medical Prescribing short course

The non-medical prescribing short courses available are:

- Independent & Supplementary Prescribing for Nurses and Midwives (Level 6, 7)
- Supplementary & Independent Prescribing for Physiotherapists and Chiropodists/Podiatrists (Level 7)
- Supplementary Prescribing for Allied Health Professionals (Physiotherapists, Radiographers, Chiropodists & Podiatrists) (Level 7).

These six-month courses meet the Government's agenda to extend non-medical prescribing and will benefit patients by enabling faster access to treatment and medication. The curriculum has been devised following the Department of Health guidelines and is approved with the NMC and Health and Care Professions Council.

These courses consist of eight taught days and the equivalent of 14 days open learning, utilising the Emap health care online open learning materials. In addition, you will undertake the equivalent of 12 days supervised clinical practice. Attendance on the taught days is mandatory.

Course start dates:

- September 2017
- November 2017
- February 2018
- March 2018

Duration:

Eight taught days

Location:

Portsmouth/Bournemouth

Entry Requirements:

Applicants should have a DipHE or equivalent or have undertaken accredited study at minimum Diploma level

Award:

40 credits at degree (Level 6) or Master's Level (Level 7)

Places for 2017/18 are limited – in the first instance please contact Pippa Stupple, Programme Director, General Practice Nursing, by email: Philippa.Stupple@hee.nhs.uk

Please note: to enrol for these courses you must have an enhanced DBS check completed within three years of the start date of the course.

Further opportunities to study at BU

.....
These courses are not funded - see website for prices.

We offer a wide range of CPD courses and stand-alone units which may be of interest to your staff. Please refer to our website for full details.

Foundations of Integrated Care and Person Centred Services

This unit will equip and enhance students skills so that they are able to work in partnership to promote and provide an enhanced delivery of person centred care and services through effective integrated care. It focuses on primary care staff and explores the national and local initiatives to promote integrated care, the level of person centred care and services that should be provided and more specifically the roles of the various professionals involved in the process of delivering integrated care.

Managing Mental Health in Non-mental Health Settings

This unit will develop knowledge and skills regarding the mental health care needs of adult clients in non-mental health settings. Students will critically analyse ways in which the mental health of clients will be recognised, assessed and appropriately referred. They will also be able to demonstrate a critical

understanding of approaches to supporting and monitoring service users with mental health needs in non-mental health settings.

Postgraduate Certificate in Public Health (online)

This fully online course prepares an individual for the potentially diverse range of roles in Public Health. It focuses on partnership working and improving health in teams through a variety of mechanisms such as health education, political influencing and behaviour change. Units of study include:

- Context & Scope of Public Health
- Exploring & Evaluating Evidence
- Health Promotion & Partnership Working.

BA/MA Care of Older People

This part-time course is aimed at those who are caring for older people in a care setting. The course will reflect local, national and international agendas and assignment work will focus on developing the student's practice. The aim is to improve service and care delivery for the growing population aged 65 years and over. Units of study include:

- Physical Health Needs of Older People
- Mental Health in Older People
- Living Well with Dementia
- Leading and Developing Older People's Services
- Compassionate Care through Humanisation
- Locating and Evaluating Evidence for Professional Practice (Level 6- BA)
- Exploring and Evaluating Evidence (Level 7- Master's).
