

# Oximetry@Home for Covid-19 patients

Tuesday 13 July 12.00pm - 1.00pm via MS Teams

With the expected relaxation of restrictions, rising numbers of Covid-19 across the South West and the summer influx of visitors underway, identifying people at risk of deterioration through silent hypoxia from Covid-19 and safely supporting them at home is a key priority for primary care.

**This short NHSEI Community of Practice Webinar is for primary care clinicians wanting to know more about how Covid Oximetry@Home can benefit their patients.**

Speakers include:

- **Dr Matt Inada-Kim** – National Clinical Director for Deterioration and Clinical Lead – AMR, Infection, AMR & Deterioration-NHS England & Improvement, National Clinical Lead COVID NHS@home Chair COVID, and Consultant in Acute Medicine at Royal Hampshire County Hospital.
- **Dr Caroline O’Keefe** - GP and Clinical Director CGH Partnership PCN, Clinical Lead for Urgent and Emergency Care – North Hants CCG, GP Lead for COVID Hot Hub and Virtual Ward, North Hampshire.

We will also highlight the patient experience and the evidence for Oximetry@Home as well as give a data overview for the South West.
